[illegible][illegible]

ed thousand inhabitants. The full-
ness from the height of the boulevard
and from out of the statue of Lictelien,
referred to by me to say, looking
down from an eminence of some
feet, two batteries mounted with
heavy guns are visible—one on the right,
the other on the left, surrounded by water.
They make on the water, with
with dark streaks, which are the cannon
commanding the pass. Between them is
the water, completely empty to the
on the right's small. Between them
four or five little bridge and galleys,
aid at finding themselves alone.

POUNTY TO THE POOR.

The only vessel in sight is stationed in
front of the fort.

LETTER FROM THE
The following is the
pold.—

piece of money. It is found as a rule, in the hands of the poorer classes, has low initials and one turret, and, in fine, everything we are accustomed to see in the hands of the poor. But when the action arises for the purpose of clearing the deck cleared, the sailors disappear, the interior and the ship, turning on her centre, goes under the water, which she does so fast that it is a piece of wood.

This singular ship is a genuine invention of the Russian Admiral Popoff, whose name she bears. In the war about 1860, he was destined to some strange occurrences. After having been shot by a smoke arising from the funnel of the Stukorov, which also is watching the Turkish fleet; and between the Stukorov and the

They are spread all over the port, and will certainly keep the headline frigates some four or five miles away from the town. This is far in excess of the depth of the water permitted the torpedoes to operate at, and it is not enough to prevent the bombardment of the town, because modern artillery is effective at a much greater distance. At this range the torpedoes will be uncertain, and consequently the damage will be small, and the moral effect will be the same. The presence of these torpedoes does not, however, hinder navigation, as their position is known and they can be avoided.

PRECAUTIONS.

Here is how the destruction of a ship might

The unique and latest episode to the British naval tradition of the "rennaisance" of the ship's company.

THE FAIR ONE

Hon. D.R. Tupper, the ship's operating manager, said: "The British tradition of the 'rennaisance' of the ship's company is a unique and latest episode to the British naval tradition of the 'rennaisance' of the ship's company."

telligence was at once awakened, and turning his prow to see what went off to Nicard and discharge. It is plain that all this is a very serious matter, and that it may be, the comical will always intrude. The comical on this occasion took the form of a small Italian bark which, three days ago, was seen to enter the harbor of the port. Not knowing about the prohibition of the torpedoes, she had arrived by a mistake. This ship had passed before a hundred times within a foot or even an inch of certain mines, and yet she had escaped. The machines do not joke. Some opinion of their effect can be formed, because on the passage of the Emperor Alexander, last Friday, the Emperor's yacht was so close to the mines that the Emperor's vessel was

well organized that it sufficed for the sovereign to point out with his finger any part of the roadstead, when immediately there appeared a number of whaleboats, each with a tall pole in the air by the submarine escape.

SCARED INHABITANTS.

This spectacle has restored confidence to the hearts of the inhabitants, among whom panic began to reign when the boats were seen by the numerous removals. At the present moment all the houses on the place Catten, which is close to the sea, are empty. In the beginning there was a general run toward the quay street in order to extend that enough carriages could not be found to carry all the fleeing people. Departure

May was, then, the first time that the fastest time on foot had been made in this more than anything else on the immense roadstead, and the submarine escape was on top of the excitement ran to the bottom of the bay. The bellows was almost empty, and there were no boats left. The people who believed that the submarine escape would fall off the cliff had been led out in full view of the world, a fact which had increased the speed was the most rapid when it came to the bottom.

It was the Jews who first spread the panic.

DEVASTATION BY SOUTH AMERICA.

THE WEST COAST RAVAGED BY A TIDAL WAVE.

— PARAGUAY, MAY 30.—A tidal wave visited the entire coast of Paraguay, from the mouth of the Rio, causing great destruction of property at various points. At Curupa the docks and the principal stores, the houses of the principal officers, the barracks and the barracks were destroyed. The houses of the principal officers, the barracks and the barracks were destroyed. The houses of the principal officers, the barracks and the barracks were destroyed.

water walls of the dock were rising. Most of the steamers riding at anchor in the bay shipped their cables, fouling their rigging, and some larger vessels stood out towards the shore. The dock was being battered and temporarily stored on the docks was ruined. On shore the greatest consternation was apparent, many families flying for safety to the high ground. By the morning all danger seemed to have passed, the sea was still somewhat agitated, but remaining gradually its ordinary tranquillity.

At Matlinda, 300 feet of the railway, which runs along the shore, was destroyed. The str. Santa Zen left Arica on the evening of the 10th, and arrived at Matlinda on the 11th. The first quarter of the morning Broeck immediately started for the half, where Sten was waiting for him. Before he got on the third quarter of the morning he was informed of a fresh storm, and he immediately turned back. He started into the element and entangled his hands, waded in the water, and was rescued by the natives. He was bruised and his throat swollen so much that he was unable to swallow. He was taken to the hospital and the doctor said he was like to die the same day. He was taken to the hospital and the doctor said he was like to die the same day. He was taken to the hospital and the doctor said he was like to die the same day.

[illegible]

destruction of life and property was owing entirely to the frightful upheaval. The vessel, which was arrived by the *Tragic*, informs us that the town of Iquique, the principal port for nitrate shipments, is left as completely desolate and uninhabitable as the earthquake and inundation of 1868. At Arica the sea washed over the town to the hill back of the church and destroyed much valuable property. The steamer *Patric*, of the United States, which was carried inland by the tidal wave of sixty-eight feet again, was wrecked on the coast. The lower part of Antofagasta, which is part of the celebrated Caracoles mining district in Bolivia, is reported completely destroyed. The *Tragic* also reports that there-

were all swept away. The shipping at Paluelon da Pina guano deposits suffered severely, and some half dozen fine vessels are reported ashore and complete wrecks. The sea in some place is stated to have

Mr. Wood moved, seconded by Mr. White, that the sum \$30 each be paid to the several persons named in the foregoing table, and the balance of the said fund be distributed in the same manner as for said persons.

Mr. Granger said he thought Tulear should conduct a similar race. He said he was in a better position than the other race municipalities. Mr. Haggerty contended that Tulear should be the first to open its doors to the others. Mr. Granger said that Tulear could educate its inhabitants, but the race Municipality in question was not in a position to do so. He said that the other municipalities that received a vote were then added to the original motion, but Tulear receives the same amount,—when a motion passes.

[illegible]

Mr. Ayres considered the maps of the State furnished did not explicitly enough show the proposed improvements in the location of the village as described in the By-law. Mr. Ayres's recommendations were adopted. By-law No. 7 was passed. Council reported progress, and asked for further action. Resolved, That Council adjourn.
